

'Rubbish Clearance and Waste Removal Limited' is committed to leading the way by example, in minimising the impact of its activities on the environment.

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its fleet, and the choice and use of its power equipment.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source equipment / eco-friendly products wherever possible to minimise the environmental impact of all works undertaken by the company, and thus the client.
- Meet or exceed all the environmental legislation that relates to the Company.
- Lead the way by example in 'best practise procedures' in consideration of the environment, the community and the planet itself at all times.
